Not Just a Tablet

I am a sophomore undergraduate at The South Dakota School of Mines. I am studying Mining Engineering here at school and expect to graduate in 2018. So far, I am enjoying my stay here at the Mines and my studies, while still challenging, are made easier by the Fujitsu Lifebook that we have thanks to our Tablet PC program. Taking notes is a sure thing here at Tech, if you want to succeed in classes. The Lifebook is the perfect piece of equipment for this task. I really enjoy being able to put the laptop into tablet mode and being able to physically write my notes! I learn better when I write my notes, so the Fujitsu is great as a note-taking tool.

The Fujitsu's extra battery, in my opinion, is the best trait the PC has. In a studious setting, it is never known where a student will be when they need technology. The Lifebook's battery alone is good, but paired with the CD drive extended battery, the machine is every college student's dream when it comes to battery life. I can go a few days without needing to charge my laptop, and that would be a major selling point for me, if I were to buy a Fujitsu product. In my eyes, the interchangeable CD drive/battery is something that I'm surprised isn't more popular in other brands. This concept blows my mind and would easily persuade me to buy a Fujitsu, compared to a different brand of PC.

My life almost physically revolves around music. The Lifebook that we have is Bluetooth capable and I love being able to relax in my dorm (whether it be studying or hanging out with friends) while connected to my Bluetooth speaker. All around, the PC is a jack of all trades, so to speak. I can play most of my favorite PC games on it, keep my most prized research papers, and play my favorite music all in one machine. The Lifebook is a well-rounded, great fit for a college student.

I have only been in college for two years, so I am intrigued as to what else my Lifebook has in store for me. It has already been a very reliable and dependable piece of technology and I can only imagine that I haven't even scratched the surface of what my PC can do for me. I am definitely looking forward to seeing what my Fujitsu can do from here on out. I have had no problems with it so far, and don't really see any coming in the near future.

Thank you for your donations to this great institution. I (and hopefully my classmates) believe Fujitsu America is a very gracious organization because of this scholarship opportunity. I cannot imagine how different my college life would be without donors like your company.

Thank you, again.

Sincerely,
Evan Hagenlock
