shaping tomorrow with you

Fujitsu Mobility Education Solutions

Built for Education.
Ready for the Future.
Powered by Intel®
Core™ i7 vPro™ processor.

Discover a Better
Way to Work with
Intel® Inside™

Classrooms today are dramatically different from the classrooms of previous generations. Interactive learning is replacing teacher-led classrooms. Students are learning by leveraging mobile devices like tablet PCs to connect and collaborate with teachers and each other and with the world beyond the school.

As an educator, how can you best take advantage of these trends? How can you use technology to truly transform the way you teach?

Fujitsu education customers consistently point to Fujitsu as the best way to make this transformation. Patrick Vigneron, IT Manager at Athol Murray College of Notre Dame, says that Fujitsu enables teachers to have access to practically limitless information resources at the touch of a button that they can share instantly. Similarly, students have a single repository for all the information they need. According to Vigneron, "The students love the Fujitsu tablets and they really have found it easier to prepare for exams, which brings better results." In addition to enabling a 21st century classroom, the school is saving \$60,000 per year on its textbook budget and \$1,000 each month on paper costs.

At St. Joseph's Academy, one of the key benefits of using Fujitsu solutions is the student-run help desk, which has empowered the students to be in charge and learn in the process. Students are fully trained and work side by side with the Fujitsu team to ensure they can effectively troubleshoot issues and provide timely support. Linda Harvison, Principal, believes her students are at an advantage based on the school's integration of pen and touch technology into their teaching and learning programs, and that the students are already leaders in the world of technology.

Fujitsu solutions for education will enable you to migrate your classrooms from textbooks and lectures to an interconnected, student-driven learning environment – a learning environment for the 21st century.

This table highlights special Fujitsu offerings, along with the associated benefits.

Fujitsu Education Solution Offering	Benefits
Detachable keyboards and bi-directional displays	Better and easier adaptability and collaboration
Pen and touch technology	Being able to switch back and forth from stylus input to touch input enables math and science students to easily adapt to current curriculum requirements
Systems that run all day on one battery charge	Students are always connected, wherever, and whenever
Integration with a school's environment	Eases the migration from old to new
Ruggedized systems that withstand rough handling	Downtime is minimized
A broad portfolio of lightweight mobile systems with a range of screen sizes	Industry-leading displays provide crystal clear viewing providing the best solutions for each classroom environment

Professional services and customization	The Fujitsu ability to pre-configure each device before shipment greatly simplifies the rollout support on both system design, deployment and training for seamless integration into learning environments
Always-on access to information	Teachers have access to, and can share, practically limitless information resources at the touch of a button; students have a single repository for all the information they need
Excellent security	Protects devices and data

With over 20 years and 40 generations of mobile PC products, Fujitsu is synonymous with quality and has developed a reputation of providing reliable mobile solutions to schools worldwide.

Fujitsu implements a rigorous testing program from shock, vibration and thermal tests through humidity and EMI tests to ensure the highest system integrity.

Fujitsu is your ultimate partner for enabling a 21st century learning environment.
